Invest into your future!

Today gaming industry is developing rapidly and encouraging billionth investments.

According to analysts, ICO involved into the gaming industry is up to 40% of the total number of successful projects. Not surprising: various studies show that this sector remains one of the most stable. Indeed, despite the economic crisis, the dollar exchange rate and climate change, people still need entertainment.

Experts predict that by 2021 spending on entertainment will be total \$ 180.1 billion, or 10.3% market growth from 2017 to 2021.

How It Works

Vela brings developers and players together. Developers can sell their game and app development on our portal. There will also be a turnkey application auction where anyone can buy pre-built solutions and find work to develop.

More facts about Vela

In the past 20 years, game industry has maintained rapid growth and quick iteration in the result of the dividend release and reform of the demand side and the supply side.

We plan to create a platform for Blockchain Gaming, use the unique payment system and reward gamers on it. Actually, Vela has developed an intuitive all-in-one e-commerce solution.

Vela blockchain technology and its developer toolkit allow game and application developers to enhance their products with new features and mechanics that are impossible to achieve without blockchain technology. Get ready for a stream of innovations and rewarding experiences you never seen before.

Vela helps gamers to discover new entertainment venues they can instantly interact with without going through a new service account registration, safely and effortlessly.

Vela will be a virtual reality platform powered by the Tron blockchain. Users can create, experience, and monetize content and applications.

The combination of three algorithms ensures a high level of security of the blockchain and protects recorded data from any malicious actions, including Man-in-the-Middle and 51% types of attacks. Safety is the priority of public blockchain.

New blocks can be generated by the Proof-of-Stake algorithm. The more tokens are in a wallet, the higher the chance to generate new blocks. The algorithm guarantees the return of 6% p.a.

More reliable network structure, user asset, intrinsic value and a higher degree of decentralization ensure better mechanism for rewards distribution.

Token Sale Details

The Vela token sale started on the 10th October 2020. The entire sale has been broken down into 4 individual rounds with varying discounts to the base price (0.05 USD) for each Vela token.
